

Tubing Connectors and Clamps

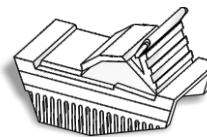

For Use with Most Any Urinary or Ostomy Appliance

Urocare® Two-Position Tube Clamp

Replacement thumb-clamp found on the Urocare® Straight-Thru Adaptor with Thumb Clamp (#6005) and white-rubber or silicone elastomer tubing (#6018). Provides an easy on/off flow control/closure. It allows either a free-flow (on) or complete restriction (off) of fluids passing through latex, silicone or white-rubber tubing 0.38" O.D. (0.95cm Ø) or less. It is not recommended for clear-vinyl tubing as this type of tubing tends to be more rigid and may not hold.

Sold by the box, 10 clamps per box.
This is a stocked item.
Non-Sterile, DEHP & Latex-Free.

LATEX-FREE
